

THINK SAFETY

HOGEN[®] onsite hydrogen generators provide power plants with a safer alternative to traditional hydrogen supply methods by:

- Dramatically reducing onsite gas inventory
- Eliminating the need for frequent gas deliveries
- Eliminating the need for plant personnel to handle hydrogen gas for daily makeup operations

HOGEN[®] H Series
Hydrogen generator

StableFlow[®]
Hydrogen control system

By combining our HOGEN[®] onsite hydrogen generator with our StableFlow[®] hydrogen control system at your plant, you will reduce your hydrogen inventory while maximizing generator efficiency.

Safe and efficient, now that's using your head.
